

IN THE SPECIFICATION:

The specification as amended below with replacement paragraphs shows added text with underlining and deleted text with ~~striketrough~~.

Please REPLACE paragraph [0031], with the following paragraph:

In addition to the above-described structure, preferably, first and second cylinder lenses 15 and 24 are further provided along a light path between the light source 10 and the first and second fly-eye lenses 25 and 26. The first and second cylinder lenses 15~~8~~ and 24~~3~~ can control the width of a beam emitted from the light source 10. FIG. 5 illustrates a comparison between a beam that is emitted from the light source 10 and incident upon the scrolling unit 20, without passing through the first cylinder lens 15, and a beam that has a width reduced by the first cylinder lens 15 and then is incident upon the scrolling unit 20.
